3. 信息工程专业各模块选修课程一览表

			The Comparison of Chinese Culture with Western Culture							
			Englisg Translation of Chinese Cultural Classics							
			Selected Readings in English Literature							
			The History of Western Music							
			Appreciation of Native & Foreign Arts							
			Appreciation of Movie & Television Art							
			Appreciation of Chinese Folk Art							
			Entrepreneurial Management							
			Telecommunication Marketing							
			Law of Labor							
			Innovation and Intellectual Property							
			Fundamental of Broadband Wireless Communication Technology							
			Introduction to Communication Network							
			MSP430 The Principle and Application of MSP430 Microcontroller							
			Methods & applications of							
			Computer Graphics							
			Mathematical Modeling							
			ACM Foundation of ACM programming							
			Information Security Technology							
			The Delicate World of Liquid Crystal							
			The approach of photon world							
			Introduction to Modern Life Science							
			Principle of Geographic Information System							
			Introduction to Nanoscience and Technology							
			Chemistry and Modern Life							
			Matlab MATLAB & Scientific Computing							
			New Energy Power Generation							

			Introduction for Automation							
			System of Data Acquisition							
			Automatic Control Theory							
			Software Engineering							
			C Analysis and Design of Algorithm C							
			Assembly Language Programming							
			Eletrical Measurement Technique							
			Technology of Computer Control							
			Virtual Instrument Technique							
			Image Understanding							
			Computer Network Technology							
			Enterprise Database Experiments							
			Wireless Sensor Network Technology							
			Error theory and Data Analysis							
			Electrical Equipment
